## FULL STACK DEVELOPER

### PROFESSIONAL SUMMARY

I'm a budding software engineer on a quest to kickstart my career while actively pursuing a degree in Software Engineering, set to graduate in 2025. My aspiration is to part of a vibrant organization that fuels my personal and professional evolution.

I have acquired diverse technical skills through my education and self-directed learning. My skills include:

- Languages: Proficient in HTML CSS, JavaScript, TypeScript, MySQL, and Python, showcasing my competence in both front-end and back-end development.
- Frameworks & Libraries: Skilled in working with various web development technologies, including React, Next-js, Node.js, Express-js, NextAuth, TanStack Query, Framer Motion, Redux, Zustand, Prisma, and Tailwind CSS. These tools enable me to create responsive, efficient, and user-friendly web applications.
- Version Control: Proficient in Git, demonstrating my ability to collaborate on projects and efficiently manage code changes.

### EDUCATION

#### BSc (Hons) in Information Technology in Software (2021 - 2025)

Sri Lanka Technological Campus (SLTC)
